## DETAILED ACTION

### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Carson C.K. Fincham on 6/18/07.

The application has been amended as follows: Abstract page 93  
Delete second and third paragraphs lines 7-25.

### ***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 3/13/07 has been entered.

***Information Disclosure Statement***

3. The information disclosure statement (IDS) submitted on 3/13/07 has been considered by the examiner.

***Allowable Subject Matter***

4. Claims 1-29 are allowed.
5. The following is an examiner's statement of reasons for allowance for independent claims 1, 12, 15, 24 and 25.

Regarding claims 1 and 12, prior fails to teach associating each captured image with a respective site location based on its respective image capture device and selecting at least one additional neuron based on whether the result indicates that a human is present in the first capture image. These features in combination with other features are not taught in the prior art. Claims 2-11 and 13-14 depend on claims 1 and 12, respectively. Therefore are also allowable.

Regarding claim 15, the prior fails to disclose selecting, after receiving, at least one neuron from plurality of neurons and selecting after the determining that the result is indicative of a detection of a human presence in association with the first sensed data, at least one additional neuron from a plurality of available neurons; determining, based at least in part on the determining that the additional result is also indicative of detection of human presence in association with the first sensed, an alarm condition. These features in combination with other features are not taught in the prior art. Claims 16-23 depend on claim 15. Therefore are also allowable.

Regarding claim 24, the prior art fails to disclose receiving a first monitoring session initiation request from a first user and second monitoring session request from a second user. Also, receiving a first response associated with the image from the first user and a second response associated with the image from a second user, wherein the first and second responses comprise indication that a human is present in the image. These features in combination with other features are not taught in the prior art.

Regarding claim 25, the prior art fails to disclose registering a plurality of sites, wherein the registration of each site comprises receiving a request from an entity associated with one of the plurality of sites, the request comprising an indication that the entity desires to register the one of the plurality of sites to be monitored by a plurality of remote patrollers. These features in combination with other features are not taught in the prior art. Claims 26-29 depend on claim 25. Therefore are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
